

Profile

Web Developer with hands-on experience in Python-based web development and hardware automation, including a Delta Arm system. Adaptable team player with a strong drive to learn and grow, seeking a role in web development or automation systems

Education

2021 – March 2026

Suranaree University of Technology, Nakhon Ratchasima

- Faculty of Engineering, Electronics Engineering (ELEC)

2019 – 2021

Ranod Wittaya School, Songkhla Province

- Faculty of Engineering, Electronics Engineering (ELEC)

Technical Skills

	• HTML	: Intermediate
	• CSS	: Familiar
	• JavaScript	: Familiar
	• Python	: Intermediate
	• C Language	: Familiar
	• Git hub	
	• PostgreSQL	: Familiar
	• PLC (Programmable Logic Controller):	Proficient
	• Electronic Circuits:	Fundamental knowledge

Soft Skills

	• Communication
	• Problem-Solving
	• Time Management
	• Teamwork
	• Adaptability
	• Fast Learner

Language Skills

	• Thai	:Advanced
	• English	:Intermediate

Contact Information

Phone : 06 2234 5413

Email : ne002545@gmail.com

Address: 449, Moo 5, Suranaree Subdistrict, Mueang District, Nakhon Ratchasima 30000

Project Experience

Project: Web HaydayShop (Gameshop)

Web Developer | 2026

Tools: HTML, CSS, JavaScript, Supabase (PostgreSQL), Vercel

- Developed an online store with an admin dashboard.
- Used Supabase for database management and real-time synchronization.
- Implemented product, inventory, and order management.
- Deployed on Vercel with GitHub.

Project: Personal Portfolio Website

Web Developer | 2026

Tools: HTML, CSS, JavaScript

- Developed a personal portfolio website.
- Built a responsive layout for desktop and mobile.
- Implemented scroll-snap navigation and smooth animations.
- Added a contact modal for inquiries.

Project: Coffee Shop Website (Figma to Web)

Web Developer | 2026

Tools: Figma, HTML, CSS, JavaScript

- Designed the UI in Figma and coded it into a responsive website using HTML, CSS, and JavaScript.
- Built the layout to adjust smoothly across desktop and mobile screens
- Tested the design on different devices to make sure everything looked right

Project: Delta Arm Control Using AI Edge Computing

Hardware Designer & Programmer | Jul 2024 – Oct 2024

Tools: SolidWorks, Blender, Python, PLC, Sensors

- Designed and built a Delta Arm robotic system.
- Developed robot control programs using Python.
- Created 3D mechanical models with SolidWorks and Blender.
- Tested and optimized system performance.

Project: Deep Learning-Based Safety Alert System

Hardware Designer & Programmer | Nov 2024 – Dec 2024

Tools: Python, ESP32 (C), Google Colab, Sensors, Deep Learning

- Developed an AI-based safety alert system.
- Built a Python GUI and programmed ESP32 for sensor control.
- Trained deep learning models using Google Colab.
- Tested and optimized the system with the development team.

Tools & Platforms

- **GitHub** – version control, collaborative development, deployment
- **Supabase** – PostgreSQL database design, real-time sync
- **Vercel** – web application hosting and deployment

AI Skills

- Rely on **Codex** and **Claude** to speed up debugging and keep documentation organized
- Use GitHub Copilot daily to write cleaner code and catch mistakes early
